Integrated EPOS for SAP Business One

Integrated EPOS for SAP Business One Ochiba OPTIONS Electronic Point of Sale

If you have **SAP Business One** and have a “Point of Service” or EPOS requirement then **Maeko Connect** is for you.

Maeko Connect lets you increase the efficiency of your trade counter/retail labour force by reducing training time, user errors and user effort by simplifying ERP processes.

Most EPOS Systems when integrated with an ERP system run in Batch Mode, updating the sales data from the EPOS system once a day. With **Maeko Connect** the transfer from and to **SAP Business One** is in real time. This truly leverages your investment in your ERP system giving a true picture of stock, sales, and availability through the whole enterprise.

With large buttons and bright, clear screens, **Maeko Connect** is easy to use and can be controlled by using a keyboard, mouse or touch screen. With fast lookup facilities it is easy to enter and retrieve customer quotes and orders and is especially suited to a busy retail environment where customer service is of the upmost importance.

Key features supported at the **Maeko Connect** till:

- Barcode scanning
